

**Watershed:** The region draining into a river, river system, or other body of water. All of us live in a watershed. Each of us is responsible for a portion of the pollution entering our waterways. Common tasks like washing our cars and fertilizing our lawns end up impacting our water quality. We are committed to improving our water quality through a series of outreach programs. If you are interested in joining, please contact: Tommy Vincent at (601) 484-2564 or [trvincen@southernco.com](mailto:trvincen@southernco.com) for more information on how you can help keep our waters clean and safe.

## Let's Go Camping

*Your next vacation is closer than you think!*

# Get to know your Watershed!

Did you know there are more than 10 beautiful camping areas located in your area? What better way to experience the outdoors than to spend the night in it!

Most people don't realize that the public is the number one polluter of our waterways. Stormwater pollution comes from:

- Over fertilizing your lawn,
- washing cars,
- spilling motor oil,
- and putting litter in storm drains.

As the stormwater moves through the watershed it picks up pollutants and dumps them in major water systems.

## OTHER WAYS TO GET TO KNOW YOUR WATERSHED:

- Stenciling Programs
- Canoeing
- Fishing
- Hiking
- Adopt-a-stream
- Adopt-a-stormdrain
